Slit liners for glasses

## Multitec

Shoei's Multitec provides the rider with the warmth, weather protection and lower wind-noise levels of a full-face helmet as well as the convenience of an open-face design. Located under the chin bar, the one touch button operation flips up the front, offering better face-to-face communication during traffic, gas and other miscellaneous stops. The face shield may also be flipped up separately.

- Aerodynamic "Bag-Molded" Advanced Intergrated Matrix Plus (AIM+) shell reducing wind noise and drag.
- Single-button release operation allowing easy one-hand opening of the chin bar.
- Adjustable flow-through ventilation.

- Lower vents directs air flow upwards across the inside of the face shield, reducing fogging and turbulence.
- Removable 3D interior liner, cheek pads and chin strap cover.
- Interior design reduces wind noise and provides a comfortable fit.
- The scratch-resistant, UV-protected Shoei CX-1V face shield that is three-dimensionally curved for increased optical clarity.
- A Quick Release Base Plate (Q.R.B.P.) allowing tool free shield removal and replacement without bulky side covers.
- Approved DOT only.
